

Dosing, Mixing and Preparation

We offer customized systems for the manufacturing of liquid pharmaceutical products and for highly complex biotechnology applications.

Applications:

- Fully automated aseptic biovessels and reactors.
- Formulation rooms and culture media preparation.
- Automatic storage systems for manufactured products.
- Innovative wireless control solutions.

EdelMIX® is a very effective all-in-one solution for mixing of liquids and solids by using a high shear mixing pump.

EdelMIX® Applications:

- Preparation of tablet coating.
- Dosing of solid raw components.
- Preparation of syrups, ointments, lotions and creams.
