

# Shredder / Homogenizer

- The set consists of a DM-540 disintegrator and a HM-250 homogenizer to be used in the sugarcane lab.
- Compact units, easy to operate and of low maintenance.
- The Shredder has been developed to receive sugarcane samples removed from the trucks through a horizontal or an oblique core sampler (up to 30 Kg).
- The Homogenizer receives the shredded sample and produces a homogeneous mixture for lab analysis.
- They can be purchased as a set or individually (shredder or homogenizer).
