

Filtration Screens

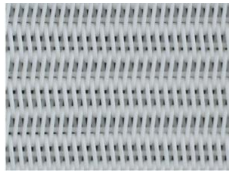

MasterPol product line

MasterPol screens are ideal for press filters in effluent treatment plants, and ash filters in the sugar and alcohol industries.

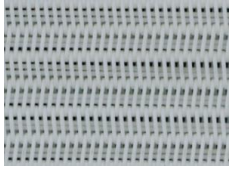

MasterPol 70:

Spiral screens - 0.70 mm threads. Used in boiler's ash washing filters and in effluent treatment plants.

MasterPol 701:

Made with 0.70 mm polyester monofilament with one filler thread.

MasterPol 702:

Made with 0.70 mm polyester monofilament with two filler threads.

MasterPol 703:

Made with 0.70 mm polyester monofilament with three filler threads.

MasterPol 90:

Spiral screens - 0.90mm threads. Used in press filters in alcohol distilleries and sugar plants, and in effluent treatment plants.

MasterPol 901:

Made with 0.90 mm polyester monofilament with one filler thread.
