

# Filtration Screens

We offer a complete line of synthetic fabrics ideal for industries like sugar, alcohol, pulp & paper, and cellulose. Our line can also be used in industrial filtration and in water treatment processes. The “Big Telas” products meet every needed requirement to guarantee the best quality in every production process.

- Spiral screens: for press filters in sugar and alcohol industries and in effluent treatment plants.
- Fabrics: for ash filters in factories, in effluent treatment plants and in the drying processes in the paper industry.
- Monofilament technical fabrics: for use in industrial ash filters and in syrup and clarified juice in the sugar industry.

## Products available:

- **MasterPol 70:** Spiral screens - 0.70 mm threads. Used in boiler’s ash washing filters and in effluent treatment plants.
- **MasterPol 90:** Spiral screens - 0.90mm threads. Used in press filters in alcohol distilleries and sugar plants, and in effluent treatment plants.
- **MasterPol FFB:** Monofilament fabrics. Will meet all technical requirements and offer an excellent flow rate and retention. To be used in ash filters, either rotary or matted.
- **MasterPol CC:** Monofilament fabrics with excellent flow rate and retention. Meets all the technical requirements. Used in syrup and clarified juice filters.
- **MasterPol Q9000:** Monofilament fabrics with 2.70 x 2.90 mm openings especially designed for ash screening process.
- **MasterPol 9000:** Spiral screens - 0.90 mm threads and special openings designed for ash screening process.
- **MasterPol 0.90 mm series (with 4, 3, 2 o 1 filler threads)**
- **MasterPol 0.70 mm series (con 3, 2 o 1 filler threads)**
