

Horizontal Vacuum Belt Filter

Benefits:

- It executes a continuous recovery of the sugars present in the cachaça (mud) originated on the decantation stage.
- Highly reliable.
- Low maintenance cost.
- Efficient performance.

Technical Specifications:

- Capacity: 12.000 tons per day (TDC)
- Length: 12.000 mm
- Width: 2.700 mm
- Height: 2.500 mm

Technical Characteristics:

- High filtration efficiency
- Larger vacuum area
- Lower POL concentration on the cake
- Lower water consumption
